SUNLOAD

Solar panels | foldable and flexible

Sunload panels are your ideal companion for your mobile energy solution. Be independent! They are small foldable, flexible, unbreakable and solid. They are ideal as a power plant for cell phones, GPSs, MP3-player, notebooks, etc.

Solid | These panels resist even the highest stress and were proved many times in expeditions, military and human operations (tested acc. US MIL-STD-810).

Mobile | Load and operate your batteries, mobile phones, digital cameras, camcorder, MP3-player, iPod, notebooks and other devices while hiking, camping, on holidays, on the beach, etc.

Outdoor | All panels can be universal used; you can fix them simply on your tent, boat or on the camper. Because of their flexible mounting system you can easily mount for instance the Solarclaw (6,5 Wp) on your backpack (see on front page).

Recommendation | We recommend using of the Sunload MultEcon Charger. It builds the interface between solar panel and electrical consumers and supplies a constant power. The MPP principle is responsible for the max. energy yield and high efficiency. The integrated Li-Ion battery stores the solar energy independent from the sun power. The damage of your devices through the overvoltage is impossible.

Technical Data	Solarclaw	6,5 Wp	12 Wp	30 Wp	62 Wp
typ. Output Voltage	12 V	12 V	12 V	12 V	12 V
open Circuit Voltage	15 V	15 V	15 V	28 V	28 V
typ. Output Current	433 mA	433 mA	800 mA	1,5 A	3,1 A
Solar Panel Power	6,5 Wp	6,5 Wp	12 Wp	30 Wp	62 Wp
Size folded (mm)	125x245x37	127x225x20	225x127x30	280x220x35	380x215x39
Size open (mm)	735x245x20	735x225x15	735x445x15	1300x535x20	1325x750x15
Weight	0,29 kg	0,2 kg	0,32 kg	0,90 kg	1,46 kg
